

**M. S. D. Pranay Reddy**

Learning Fullstack Development

[msdpr621@gmail.com](mailto:msdpr621@gmail.com)

---

**Profile**

I'm an undergrad, learning fullstack development with a passion for building responsive, scalable, and efficient web applications. I am aspiring to specialize in both frontend and backend technologies, with hands-on experience in modern frameworks, RESTful APIs, and cloud-based deployment. My focus is on writing clean, maintainable code and delivering practical solutions to real-world problems.

---

**Projects****Declutter Assistant**

A Python Qt and GUI based file management automation tool that helps manage files via rules made and interpreted from natural language to assist common computer users.

**Monkey Mask**

Unity-based 2D game with collision detection and custom player controls.

---

**Work Experience**

I'm currently focused on building a strong foundation through personal and academic projects. I look forward to gaining real-world experience through internships or collaborative opportunities.

---
